

6-(2,4,6-Trihalophenyl)triazolopyrimidines, their preparation and their use for controlling harmful fungi, and compositions comprising these compounds

Abstract

5

The present invention relates to 6-(2,4,6-trihalophenyl)triazolopyrimidines of the formula I

in which the substituents are as defined below:

10

R^1 is alkyl, haloalkyl, cycloalkyl, halocycloalkyl, alkenyl, haloalkenyl, cycloalkenyl, halocycloalkenyl, alkynyl, haloalkynyl or phenyl, naphthyl or a five- or six-membered saturated, partially unsaturated or aromatic heterocycle which contains one to four heteroatoms from the group consisting of O, N and S,

15

R^2 is hydrogen or one of the groups mentioned under R^1 ,

20

R^1 and R^2 together with the nitrogen atom to which they are attached may also form a five- or six-membered heterocyclyl or heteroaryl which is attached via N and may contain one to three further heteroatoms from the group consisting of O, N and S as ring members;

R^1 and/or R^2 may be substituted as defined in the description;

25 L^1 , L^2 , L^3 are chlorine or fluorine, where at least one group is chlorine;

X is cyano, alkyl, alkoxy, alkenyloxy, haloalkoxy or haloalkenyloxy;

30 processes for preparing these compounds, compositions comprising them and their use for controlling phytopathogenic harmful fungi.
